

ANASTASIA MARTINSON

Software Engineer

 am780@at-andrews.ac.uk  +44 7786 258846  /a-nosnitram  St Andrews, UK  anastasia-martinson

EXPERIENCE

Founding Software Engineer

KeyStone Labs

-  September 2025 – Present  Glasgow, Scotland
- Building a production-grade React Native & Fast API mobile app using Expo Router, TypeScript, Supabase, and NativeWind.
 - Currently working on ensuring security and integrating privacy features.

President

AlgoBoost Society

-  January 2025 – Present  St Andrews, Scotland
- Leading a data structures and algorithms-centred society with over 130 members, sponsored by Handshake.
 - Currently building an internal LeetCode-style platform using React, Go, and PostgreSQL, incorporating Kafka, Redis, and Nginx.
 - Directed and executed a full society rebrand and leadership transition, increasing visibility and engagement.
 - Organised weekly talks and tutorials to help members strengthen their DSA knowledge.

First Commit

Bending Spoons

-  July 2025 – July 2025  Milan, Italy
- Simulated a real-world product development cycle over the course of three days, working under tight deadlines to ship a full-stack TypeScript/Node.js application, with group text and video chat features, using WebSockets and WebRTC.
 - Received direct technical feedback and mentorship from Bending Spoons engineers.

Spring into Software Engineering

JP Morgan Chase

-  April 2025 – April 2025  Glasgow, Scotland
- Learnt from and connected with software engineers at JPMC.
 - Developed a web platform mentor-matching algorithm for MCR Pathways in a team of 5 during the Code for Good Hackathon.

EDUCATION

Bachelor of Computer Science

University of St Andrews

 Sept 2024 – 2027 (Ongoing)

Modules : CS2101 (System Fundamentals), CS2002 (Computer Systems), CS2006 (Advanced programming projects)

PROJECTS

DeBuzz

STACSHack 2025 project. Browser extension will LLM integration designed to remove all buzzwords from any webpage, calculate a "buzz" score, based on the page's content.

<https://github.com/ThatOtherAndrew/Debuzz>

UnifIDe

Promotional website in React.js for a StAndrews-based digital ID startup.

<https://github.com/a-nosnitram/UnifIDe>

Conjure Oxide Contributor

Contributing to a constraints modelling tool in Rust; building a parser and LSP for Essence language.

<https://github.com/conjure-cp/conjure-oxide>

CERTIFICATIONS

Bocconi University Summer School Machine Learning and Artificial Intelligence Lab & Entrepreneurship Lab. Issued in July 2023.

Leagues of Code

A Python Level 1 certificate from Harbour Space University. Issued in September 2022

SKILLS

Java React.js Rust TypeScript

Python C++ PostgreSQL

Version Control (GitHub) LaTeX (Overleaf)

Teamwork & Leadership Docker CI/CD

English (Native) French (Native)

Russian (Native) Spanish (Beginner)

HOBBIES

Music Making Piano & Guitar Martial Arts

Philosophical Literature
