

ANASTASIA MARTINSON

Software Engineer

@ am780[at]-andrews.ac.uk +44 7786 258846 /a-nosnitram St Andrews, UK anastasia-martinson

EXPERIENCE

Founding Software Engineer

September 2025 – Present

KeyStone Labs

Glasgow, Scotland

- Building a production-grade React Native & Fast API mobile app using Expo Router, TypeScript, Supabase, and NativeWind.
- Worked on ensuring security and integrating privacy features.

President

January 2025 – Present

AlgoBoost Society

St Andrews, Scotland

- Leading a data structures and algorithms-centred society with over 130 members, sponsored by Handshake.
- Currently building an internal LeetCode-style platform using React, Go, and PostgreSQL, incorporating Kafka, Redis, and Nginx.
- Directed and executed a full society rebrand and leadership transition, increasing visibility and engagement.
- Organised weekly talks and tutorials to help members strengthen their DSA knowledge.

First Commit

July 2025 – July 2025

Bending Spoons

Milan, Italy

- Simulated a real-world product development cycle over the course of three days, working under tight deadlines to ship a full-stack TypeScript/Node.js application, with group text and video chat features, using WebSockets and WebRTC.
- Received direct technical feedback and mentorship from Bending Spoons engineers.

Spring into Software Engineering

April 2025 – April 2025

JP Morgan Chase

Glasgow, Scotland

- Learnt from and connected with software engineers at JPMC.
- Developed a web platform mentor-matching algorithm for MCR Pathways in a team of 5 during the Code for Good Hackathon.

EDUCATION

Bachelor of Computer Science at the University of St Andrews

Sept 2024 – 2027 (Ongoing)Dean's List for Academic Excellence, 2024-2025.

CERTIFICATIONS

Bocconi University Summer School

Machine Learning and Artificial Intelligence Lab & Entrepreneurship Lab. Issued in July 2023.

Leagues of Code

A Python Level 1 certificate from Harbour Space University. Issued in September 2022

SKILLS

Programming Languages: Java React.js Rust TypeScript Python C++ PostgreSQL Haskell
Languages: English (Native) French (Native) Russian (Native) Spanish (Beginner)
Other: Version Control (GitHub) LaTeX (Overleaf) Teamwork & Leadership Docker CI/CD

HOBBIES

Music Making Piano & Guitar Martial Arts Philosophical Literature

PROJECTS

Your Look [Private repository](#)

Fullstack React Native mobile application for haircut tracking across barbershops and hair salons.

DeBuzz <https://github.com/ThatOtherAndrew/Debuzz>

STACSHack 2025 project. Browser extension with LLM integration designed to remove all buzzwords from any webpage, calculate a "buzz" score, based on the page's content.

Conjure Oxide Contributor <https://github.com/conjure-cp/conjure-oxide>

Contributing to a constraints modelling tool in Rust; building a parser and LSP for Essence language.
